

KMB MARKING BUZZER UNIT

For Keyence MD-X, MD-U & MD-F Laser Markers

The KMB Marking Buzzer Unit is an add-on accessory that provides an audible alert when a laser marking operation is complete, notifying operators at the end of each cycle.

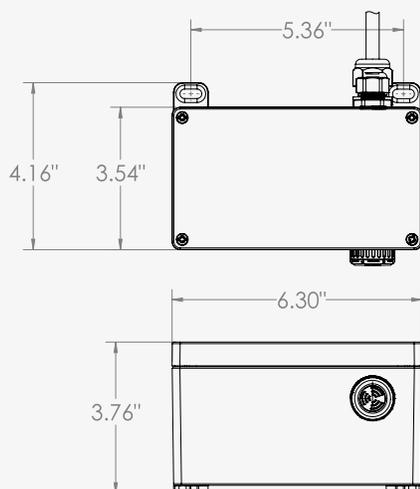

Mounting to the top of the enclosure, it includes a dedicated 120 VAC power cord and a signal cable that connects directly to your laser marker controller.

The buzzer can be configured for continuous or pulsing operation, with adjustable sound duration based on operator preference.

FEATURES

- Audible buzzer alerts on completion of each marking cycle
- Compatible with MD-X, MD-U, and MD-F laser markers
- Mounts to enclosure top panel (hardware included)
- Can be installed in numerous locations (drilling required)
- Sound output rated at 93 dB at 0.1 m
- Selectable continuous or pulsed sound operation
- Sound mode factory set (changeable via internal jumper)
- Adjustable buzzer duration via internal adjustment screw
- Dedicated 120 VAC power cord
- Three-wire signal cable connects to Keyence controller
